Overdose

Wolfgang Gartner

Get inside and out and claiming why I care
My heart beat silence sounds, the music's loud in the air
And I can't find a way around because of what you've been giving me
And I've tried every drug I've found but there's nothing like the one
you've been giving me, giving me, giving me

I know I might be crazy
Yes I know the shade is fading
I know I might be crazy
but I would rather close the lights and get high on you
Yes I know the shade is fading
but I would rather close the lights, getting high on you

I just wanna OD on you
I just wanna OD on you,
Baby can I OD on you
I just wanna OD on you

I feel like going down then baby you come near
I feel like I could drown because your loving ain't here
Now I can't find a way around because of what you've been giving me
And I've tried every drug I've found but there's nothing like the one
you've been giving me, giving me, giving me

I know I might be crazy
but I would rather close the light and get high on you
Yes I know the shade is fading
but I would rather close the lights, getting high on you

I just wanna OD on you
I just wanna OD on you,
Baby can I OD on you
I just wanna OD on you

I know I might be crazy
Yes I know the shade is fading

I know I might be crazy
but I would rather close the light and get high on you
Yes I know the shade is fading
but I would rather close the lights, getting high on you

I just wanna OD on you
I just wanna OD on you,
Baby can I OD on you
I just wanna OD on you
I just wanna
