

Violence

Wolfsbane

On the TV news, in the papers every day
Seems there's another war that's in another place
All that you get shorter than the few become
You gotta fight to live

Lower forms of life are worming in the streets
Can you believe they're talking about you and me?
All the jobs are gone, see the grown men read
You gotta fight to live

Sick but true, everything they do is just
Telling you they don't care
Sick but true, everything they do is just
Telling you little cares

Violence in the air
Violence in the air
Violence in the air
Violence!

In suffering and violence, we must watch ourselves
Rendering supermarkets, emptying all the shelves
Dancing on the corps of the brave new world
You gotta fight to live

Sick but true, everything they do is just
Telling you they don't care
Sick but true, everything they do is just
Telling you little cares

Violence in the air
Violence in the air
Violence in the air
Violence! Violence!

And the fascists rule the nations, (christians skin and kick to kill ?)
In the church of Christ, this ends all God's will
We've broght it upon ourselvs
We're evil,evil,evil,evil!

????????? - they took us all in paranoia
Making us forget liberties regret,
They don't know anymore than you and me because you see
They're evil,evil,evil,evil!

Sick but true, everything they do is just
Telling you they don't care
Sick but true, everything they do is just
Telling you little cares

Violence

Violence

Violence!
