

All my life knew
What I liked
And I could never
Hide it
My light is bright
It's deep inside
It's coming out
It's shining
Diamond
Blinding
Hit me just like lightning
This feeling I can't fight it
This love is perfect timing

Ask yourself
Who can love you better
It takes off all the pressure
And brings out the truth
So remember
We're not here forever
Hurt you baby, never
I know it's you

I can't help myself when you come round
And do
All the things that put me in the mood
People call me crazy but you're
Someone I can't lose
I only love these kisses
Cause it's true

So I'm a focus focus on focus
On you
Focus on you
Focus focus on focus
On you
Focus on you
