

Love Bites

Wolftyla

You been on demon time
And I'm in the dark with ya
I play my part with ya
Feels like making art with ya

Call on me at night
To do the things we do
Now we getting lunch at 2
Trying something new

You rock with me 'cause I don't do too much
It ain't love but this is close enough
Touch my body, take it slow
You tell me no one has to know
But every time before I go...

You're leaving love bites all on my body so they know I'm with
you
You're leaving love bites all on my body so they know it's from
you
You're leaving love bites all on my body so they know I'm with
you
You're leaving love bites all on my body so they know it's from
you

I could slide with ya
Solid, so I'm never switching sides on ya
Asking you your sign to align with ya
All up in this room and we whylin'
Can't ruin my life, but you can try it

You rock with me cause I don't do too much
It ain't love but this is close enough
Touch my body, take it slow
You tell me no one has to know
But every time before I go...

You're leaving love bites all on my body so they know I'm with
you
You're leaving love bites all on my body so they know it's from
you
You're leaving love bites all on my body so they know I'm with
you
You're leaving love bites all on my body so they know it's from
you
