

## Sheds

Wolverine

They say that time will heal  
That life is all but real  
You see my worlds collide  
A happy man so sad

I know the fire is safe  
Inside the icy shell  
A place where you can't see  
That's where I'd rather be

In this world of conformity  
I know there's no place for me  
I stand here on the edge  
See my face reflect

A well of eternity  
But it pains too much to see  
A lock you can't unlock  
A key that's mine to keep

See the trail through time and space  
Find your way I'll meet you there
