

Side Effects

Woosung

Okay, alright
I know I'm not perfect but just stay the night
Flyin' like a moth, so drawn into the light
All I've ever known is in the same old cycle
And it's got a tight hold

One time forever (It's like)
Can we get better? (But I)
Realize, realize
You're not so clever (Yeah, yeah)
What am I feeling? (It's a)
Drug that you're dealing (To me)
I'm high, you're high
I

I can't take these side effects
Think I need a vibe check
Dreamin' while I'm wide awake
There's something I wanna say
I'ma need an antidote
Walkin' on this tight rope
There's something I gotta say to you
Oh, oh, oh

Okay, alright
I know I'm not perfect but just stay the night
Flyin' like a moth, so drawn into the light
All I've ever known is in the same old cycle
And it's got a tight hold
Don't waste my time
I know we're not perfect but just say I'm right
I could be a butterfly beneath the sky
All I've ever known is in the same old cycle
And it's got a tight hold

Do what I say, you're under my spell
Go through withdrawals without me, it's hell, boy
Chills runnin' down your spine right now
Cold sweats when the lights turn down
I'm the smoke and you're the haze
And you love a good chase
