

Best Place I've Ever Been

World Party

If you should fall you won't need a song tomorrow
If you should call I won't always be for sure

I've seen the light
In everything
I know its right
This is the best place I've ever
Best place I've ever been

If she should fall you won't need a song tomorrow
If you should call she won't always be for sure

I've seen the light
In everything
I know its right
This is the best place I've ever
Best place I've ever been

No-one can free her
No-one here gonna say a single word
No-one can see her
No-one here, and some are never heard

If you should fall you won't need a song tomorrow
If you should call I won't always be for sure

I've seen the light
In everything
I know its right
This is the best place I've ever
Best place I've ever been

I've seen the light
In everything
I know its right
This is the best place I've ever
Best place I've ever
Best place I've ever
Best place I've ever been
