

# Molecular Winds

Wormed

Triggered by supernovae  
Primordial plasma

Dominated by a different form of dark energy  
Collapsing dying from the inside out to violent

Metamerism . Overestimation  
Ab Initio . Raw materials  
Biofuel . Quantum chemistry methods  
Exothermicities . Positional selectivity of the abstraction process  
Quantum barrier . Phenomenologically  
Electronic near-degeneracies

Permanently mounted assemblers: conveyor belts  
Femtosecond laser-etched: exhausted their fuel  
Nanostructures: destroyed  
Proton half-life

Collisions between stellar remnants  
Absolute zero: quantum tunneling  
Subatomic particles  
Neurotransmission  
Intelligent information processing

Driving pulses  
Amplitude decreases  
Transition state  
Primordial era

A stars collector

Instabilities  
Noncollisional  
A call from the cosmic horizon  
Consumed: black hole

Modifying the shape of the galaxy itself  
Intergalactic voyage  
Intergalactic colonisation  
A call from the cosmic horizon  
Gravitational damaging force.
