

## Vanilla Sky

Wrabel

Where you wanna be right now?  
Nowhere else in the world that I wanna be right now  
Be right now  
Tell you 'bout my worst nightmare  
It's laying down in a house  
Waking up and you're not around  
Not around

Oh what a vision  
Oh what a sight  
Vanilla sky above your head  
I see the light  
Don't say you're leaving  
That's a bad night  
Vanilla sky, vanilla sky  
You are my paradise

You are my paradise  
Can you just stay here with me?  
Can I just stay here with you?  
Can we just lay here and be  
Can we just stay here?

I know what I feel right now  
I know what I wouldn't feel if you were right here making me feel right now  
Feel right now  
A lot of things let me down  
Thank God you are not a lot of things  
You're the only thing that's clearing up on my big strange dark clouds

Oh what a vision  
Oh what a sight  
Vanilla sky above your head  
I see the light  
Don't say you're leaving  
That's a bad night  
Vanilla sky, vanilla sky  
You are my paradise

You are my paradise  
Can you just stay here with me?  
Can I just stay here with you?  
Can we just lay here and be  
Can we just stay here?
