

# Break Down

Wrekonize

Ah Ah Ah C'mon C'mon Come C'mon Yeah

I seen them wandering  
Like they don't know where to go  
Like they don't know how to live  
Like they don't want us to grow  
I seen them squandering  
This little gift that I hold  
This little fist that I close  
Ain't gonna be bloody no more Ah Ah

If you need me you'll find me digging up the trench  
Right behind the park bench  
I've been underground since  
They put up this here fence  
Wanna hold me back but I can't be contained  
Wanna close the latch but I can't be arraigned

I built this fucker from the ground up  
Latening the sounds up  
Acting like a foul slut  
Will get you asking "Now what?"  
You can't imagine what I've seen so far in this life, this life, this life

I've built walls, they only break down  
Break down  
They only break down  
They only break down  
They they only break down  
B-b-break down  
They only break down  
They only break down  
No, no, no

I seen them acting like  
They ain't got nowhere to be  
They ain't got nothing to need  
Cause life is simply a dream Ah Ah  
I seen them killing us  
At the whim of their greed  
Even women would see  
See nobody is free

If you need me you'll find me breaking down your doorstep  
Caught you catching your breath  
Two turns into more steps  
Hide under the floor guess it's every man for himself these days  
Guess it's hard to pay when you know other ways

I know a million mother fuckers who sweat just for the check  
And carry planets on their shoulders with a load of regret  
You would not believe the places I have been to try and live out this life,  
this life, this life

I've built walls, they try to break down  
Break down  
They only break down

They only break down  
They they only break down  
B-b-break down  
They only break down  
They only break down  
No, no, no
