

Break Ya Neck (Freestyle)

Wrekonize

Ring the bell ring the bell better get alarmed
Need a second to get better with a leather palm
Showing up to your job with a letter bomb
Anthrax in the center of the pentagon
In it with a bit of the bang bang
Get 'em up and get 'em all a critical mainframe
Limited to litigate a cynical lame brain,
Ignorant vein vein, typical shame shame
This here's a warning shot, to all those acting funny,
I'm loading up to get respect and Apple Patent money,
This here's the final 5,
But I need to get a liver vibe,
Meet me in the middle with the iodine,
I think it's 'bout to time that I die for mine,
How 'bout your needs? I thirst for more heat,
Dropping shit that'll make 'em all really wanna
Stop - drop, and roll,
I got them tour needs, bring the liquor please,
I live a life that is really quite nice full of
Rock - and, roll
This game is pure greed, big racks and more sleaze,
But it's all in the good name of
Hip-hop - and, soul
So let them whores breed, who needs the sword cleaned?
Ben has got a better bit of bangers that'll put your Betty
Back down on her hands and knees,
Please emcees, if you need to breathe free,
Then do not challenge me, we agree? Please leave,
Want a solo from the kid, I'll oblige no distortion,
My next album is set to make Mitt Romney pro-abortion,
Cause kids can't compete, when the Brit spits on the beats,
With the verbs and with the speech, I been bred to rep the Heat
,
It's cliché that I might repeat, I'm a get 'em up under my clea
ts,
And them last bars were weak, that's just how they sound to me,
Get a trip down to Miami come and get a humid reply,
The drinks are doubles and if troubled well then you just might
die,
Get your hustle put 'em in a muzzle we been loving the sky,
Wanna give another public supply, of what you been fucking deni
ed,
I'm an 8-3 king with a HD thing,
Enemies who hate me you know I don't stop...
But I keep and I keep on going in,
Get it banging all up in the bigger lower end,
Get another from the brother with the solar pen,
That good 'ol bottom rock...
