

Last Night

Wretch 32

This could be the last time
But we said that last time, last night
Underneath the sunrise
Seems like our part ties part time
Miss me with the "miss you"s, I'm here now
Alive and well
Miss me with the "miss you"s, you're here now
Alive as well

Can we at least make it to Christmas?
I already know the gift I wanna give to you
If we at least make it to Christmas
I'ma see the tears fall from what I give to you
If we at least make it to Christmas
Can we at least make it to Christmas?

Yeah, my girl a dime a dozen, I give her a dozen dimes
A hundred times, ten times over let's multiply
Add that to the fact I'm providing we won't divide
But if all things come to an end, there must come a time
Maybe it's now, or maybe it's doubt
Or maybe we floating or maybe we drown
Or wait til I've spoken, breaking us down
But if we argue about the world it should stay in the house
Some things nobody haffi know
Not everyting we have to post
But on Instagram dem a show [?]
But this is real life [?] show
I see a difference in you, you see a difference in me
Let's put those differences aside, see what the difference will be
You say I'm shouting and to you, I say the same thing
But when we shouting we just always say the same thing
Brand new Mercedes by the houses
How the fuck we end up in a salvage?
That's 'cause out a mole we make a mountain
Yeah, you don't ever rest with your announcements
When you want a pen, I bring a fountain
If you want a pound, I give a thousand, yeah
You say you want a man who wears the trousers
I got Balmain above my Calvins

This could be the last time
But we said that last time, last night
Underneath the sunrise
Seems like our part ties part time
Miss me with the "miss you"s, I'm here now
Alive and well
Miss me with the "miss you"s, you're here now
Alive as well

Can we at least make it to Christmas?
I already know the gift I wanna give to you
If we at least make it to Christmas
I'ma see the tears fall from what I give to you
If we at least make it to Christmas
Can we at least make it to Christmas?

Even though Christmas ain't my favourite, I'm Santa to all my family
Games nights, you come and banter with my family
Late nights, I told the Gram I should win a Grammy
In the station, got a standing ovation they couldn't grab me
Man, I've come a long way
It's funny that you'll come and not stay
Life's short and it dwarfs
And of course when you come from a place
Where you've really seen your loved one die of old age
I don't wanna see my love come and die of old age
I wanna be youthful youthful youthful
Make the pear fruitful fruitful
I'll give you a seed if you'll water it every week
I'll give you a team if you're always top of the league
Best you have my back because I'm always up on my feet
Been jumping hurdles and running circles, I couldn't breathe
Chasing my tail, losing my head, 'cause I couldn't reach
Pay attention - life is expensive, I got receipts
Saw my mum tryna find it guess it slipped through her fingers
'Cause I never met the one that put a ring on her finger
Thought was a summer love, guess they were pissed in the winter
Cool, you my half-pint but in the whip I semi-skim you
If a glass breaks in half, it don't fit back together
So if you break my heart, it won't fit back together
Push me down, I sit up, that's a six-pack forever
Cardio, scenario, guess we did laps together
Good morning

This could be the last time
But we said that last time, last night
Underneath the sunrise
Seems like our part ties part time
Miss me with the "miss you"s, I'm here now
Alive and well
Miss me with the "miss you"s, you're here now
Alive as well

Can we at least make it to Christmas?
I already know the gift I wanna give to you
If we at least make it to Christmas
I'ma see the tears fall from what I give to you
If we at least make it to Christmas
Can we at least make it to Christmas?
