

Sky full of stars, hold me in your arms, I just wanna dance
(You give me something I can feel)
Now we're chest-to-chest, we can have a heart-to-heart
(You give me something I can feel)
See, I'm blinded by the lights but you guide me through the dark
(You give me something)
I'm hoping that we last cause even when we're apart
(You give me something I can feel)

These girls ain't real like you, these girls don't feel like you
Late nights wondering where I've been but right through
Just tryna be real 'bout you
So unless I say I did and man, I didn't
And even though I see distant, I'm just different
You're tryna have my cake and cancel all my wishes
I don't think blowing out my candles make a difference
Because you know you can't be them, you're screaming "carpe diem"
What's on your arm and leg cost an arm and a leg
I call you Barbie-head, you get me back like Ken
They're liking all your pictures but they know they can't be friends
Because you're way out of their depth, way out of their depth
I'm a gangster and a gent, we don't even half the rent
I float, give you butterflies and sting you with the pen
I'm the greatest, now let me show you what Ali meant

There's a sky full of stars, hold me in your arms, I just wanna dance
(You give me something I can feel)
Now we're chest-to-chest, we can have a heart-to-heart
(You give me something I can feel)
See, I'm blinded by the lights but you guide me through the dark
(You give me something)
I'm hoping that we last cause even when we're apart
(You give me something I can feel)

These girls ain't built like you, these girls won't kill like you
I must be one step from heaven, you should see my crew
Just tryna be real by you
So I ain't tryna L-I-E
Cause only God knows where the hell I've been
And sometimes it feels like the force is with you
Until I'm back with my Return of the Jedi speech
I'm a G with two Os and one D
From the roads, I rose up from the concrete
That means I'm hard as a nail, that makes it harder to fail
They say love hurts only 'bout as hard as you feel
All these chicks could have us falling into debt
But the money won't determine my success
I mean the money won't determine what you meant
I mean what you mean, what'd you mean that I ain't working on our strengths?
I used to have you walking on eggshells, we trampled 'em
I mean, forget all your friends' tales, they're scandalous
See, they're skipping your skill to tell you cancerous
Pictures worth a thousand words, This is the big G, 3D in watercolour
I built a house [?], I'm a Warner Brother
I bring the table to the table, I'm that slaughter brother
See I'mma feed you like I need you
Baby, look above us, can't we see the

Sky full of stars, hold me in your arms, I just wanna dance
(You give me something I can feel)
Now we're chest-to-chest, we can have a heart-to-heart
(You give me something I can feel)
See, I'm blinded by the lights but you guide me through the dark
(You give me something)
I'm hoping that we last cause even when we're apart
(You give me something I can feel)

Sky full of stars, hold me in your arms, I just wanna dance
(You give me something I can feel)
Now we're chest-to-chest, we can have a heart-to-heart
(You give me something I can feel)
See, I'm blinded by the lights but you guide me through the dark
(You give me something)
I'm hoping that we last cause even when we're apart
(You give me something I can feel)
