

Crash and Burn

Write This Down

So take a moment just to think about how it works
And how I tried to change the outlook
'Cause it went from being a band
To a business plan
And I already know that I screwed up the fast track
Broken alone and miles from home
So we drove through the night because we had to survive
On what our parents gave us

I crash and burn just like I always do
I live and learn the truth
I gotta get back to the things that I once loved
Back to what I know
Disasters and gamblers and failures can't break me down

So take a moment to figure out what to do
And walk away from all the miscues
And the cautionary tales
And the present thrills
And I already know 'bout delusions and setbacks
Nothing but gifts to take the hint
To get back in the van and just pray for the chance
On what our parents gave us

I crash and burn just like I always do
I live and learn the truth
I gotta get back to the things that I once loved
Back to what I know
Disasters and gamblers and failures can't break me down

Come hell, high water
I won't give up
Come hell, high water
I won't give up

I crash and burn just like I always do
I live and learn the truth
I gotta get back to the things that I once loved
Back to what I know
Disasters and gamblers and failures can't break me down
Can't break me down
Can't break me down
