

## Any Second

Written By Wolves

(Do you see the hate in the people's eyes?  
Do you hear the pain in the people's cries?  
When will you admit that it's all a lie  
Drove a generation to suicide

Your time has come now say goodbye  
I know your plan was to divide  
But it backfired and we multiplied  
You did this to yourself now it's do or die  
You did this to yourself now it's do or die  
You did this to yourself now it's do or die!)

How the fuck do you sleep at night  
Warm in your bed while your people die  
Say what you want but you can't deny  
The system is broken the end is nigh

So open up, take your medicine  
We're running on adrenaline  
Clock is ticking better let us in  
Are we having fun let the game begin

Any second this will all explode  
So say your prayers confess your sins of old  
The doors are locked and there's nowhere to go  
You're all alone  
On your own now

See we're more than an angry mob  
And this is more than just feeling robbed  
Did someone order a Molotov?  
Light it up, let it do it's job  
Light it up, let it do it's job!

Any second this will all explode  
So say your prayers confess your sins of old  
The doors are locked and there's nowhere to go  
You're all alone  
On your own now

The doors are locked now  
And there's nowhere to go  
So say your prayers now  
This place is ready to explode

Any second this will all explode  
So say your prayers confess your sins of old  
The doors are locked and there's nowhere to go  
You're all alone  
On your own now

Any second this will all explode  
So say your prayers confess your sins of old  
The doors are locked and there's nowhere to go  
You're all alone  
On your own now
