

# Bonfires

Written By Wolves

Feel the passion rising  
Feel it burn inside your soul  
They've taken too much from you  
Now it's time to take back control  
Every shattered story  
They resonate as one  
We can start an army  
We'll rise up and won't stop till we're done

Sometimes we all just need to  
Stand up, fight back, let's take control  
Watch it all burn down

So light the fires  
Let's take back our dreams  
We'll watch it all burn down tonight  
We'll build bonfires  
From their hate and greed  
We'll watch it all burn down tonight

Watch the storm clouds gather  
Some things you can't outrun  
The dark will be our saviour  
Let the night come, tear down the sun  
Let them scream out "Shots Fired"  
Dare I say it, but this is fun  
Did you honestly think that we'd sit back  
And let you suffocate us, here we come

Sometimes we all just need to  
Stand up, fight back, let's take control  
Watch it all burn down

So light the fires  
Let's take back our dreams  
We'll watch it all burn down tonight  
We'll build bonfires  
From their hate and greed  
We'll watch it all burn down tonight

Watch it all burn  
Watch it all burn down  
Watch it all burn  
All burn down

So light the fires  
Let's take back our dreams  
We'll watch it all burn down tonight  
We'll build bonfires  
From their hate and greed  
We'll watch it all burn down tonight
