Starlight

Written By Wolves

This is right now

Tell me something, have you ever felt like you were free?
Like really, truly let the moment take control and just be?
While they're all out there telling you that we're just born to die
I'll tell you something, baby, we were born to touch the sky
So give up now on thoughts that maybe there is something more
And let right now just take over
Leave all thoughts of yesterday and tomorrow at the door
And let us take you somewhere that you've never been before

I feel it taking over
(Feel it closing in on me)
I feel it take control, of me

This is right now
Scream it out loud
Let the moment take control
Feel it in your heart and soul
'Cause you know
Tonight is all
There is no tomorrow
For one, for all
Scream it out loud
This is right now

Tell me something do you think you've really let go?
Broken the shackles of a world that would prefer you don't know,
That there is more out there to life than just your nine to five?
Come with us, baby, and I swear you'll finally feel alive
You see the problem is the fear that's in behind your eyes
Let right now just take over
It's in your stare, we're almost there, the heat is starting to rise
So buckle up 'cause where we're going is the highest of highs

I feel it take control, of me

This is right now
Scream it out loud
Let the moment take control
Feel it in your heart and soul
'Cause you know
Tonight is all
There is no tomorrow
For one, for all
Scream it out loud
This is right now

Can you feel the heat? It's rising
Boiling point and still it's climbing
Now your heart is beating faster
Out your chest and through the rafters
You've lost all your inhibition
Dancing's now your only mission
Seems we've finally taken over
All that's left is here and right now

This is right now
Scream it out loud
Let the moment take control
Feel it in your heart and soul
'Cause you know
Tonight is all
There is no tomorrow
For one, for all
Scream it out loud
This is right now

This is right now
Scream it out loud
Let the moment take control
Feel it in your heart and soul
'Cause you know
Tonight is all
