

Write The Ending

Written By Wolves

I can feel you dripping down my body
Like the thousand beads of sweat
That you so expertly created
While in perfect silhouette
The moonlight frames you like an angel
And you glow against my skin
Like gasoline and matches
Fuel my fire
You're my heroine

If this is what you wanna do now
Count me in
We can light a match and burn it down
Are you in?

We don't wanna live forever now
We just wanna write the ending
We can burn this whole place to the ground
And be the only ones still standing
Hand in hand we'll burn this to the ground

You ready?

Is there a sensation more powerful
Than the one you're giving me
If there is I don't think that I could take it
You're pure ecstasy
You're all I've ever wanted
Let's make a pact
Sign our names in blood
Let's start a revolution
I promise you my eternal love

You ready?

We don't wanna live forever now
We just wanna write the ending
We can burn this whole place to the ground
And be the only ones still standing

Hand in hand let's burn this to the ground
We don't wanna live forever
Hand in hand let's burn this to the ground

Take my hand
Run away with me forever
Understand
We'll disappear into the never
Take my hand
Run away with me forever
Understand
We'll disappear into the never

Hand in hand let's burn this to the ground
We don't wanna live forever
Hand in hand let's burn this to the ground

We don't wanna live forever now
We don't wanna live forever now

You ready?
