

I Know It's Real

Wye Oak

If you are right
This happens all for every human being
Coloring all of us unnoticed
Still, I lie
Stronger than energies riding on my back
Anchoring every day to their last

I know it's real
And it echoes me without any sigh
Science is something artificial
It is my companion now as it all goes dark
Day-dreaming only left it's meaning
And this is all I ask of it

Time aptly fades
I'll break the dam flush over on my face
Do you see through their love
Through their weight
All of my life
How every finger-ring bring lumps of gold
Ancestry never leaves us alone

I know it's real
And it echoes me without any sigh
Science is something artificial
It is my companion now as it all goes dark
Day-dreaming I am not my shadow
And this is all you need to know
