He Was There (When I Needed You)

Wynette Tammy

I never thought I'd let him another to touch me
After all the love I had for you
But I could stay alone just so long
And I got so lonely with you gone

Sometimes when I'm lovin' him I call your name
He pretended not to hear me but he has to
As time goes on he's makin' me forget the pain
I'll be alright but I'll never be the same

He was there when I needed you
Doin' all the things you used to do
He's made me smile again he's not you but then
He was there when I needed you

Don't get me wrong there's days you're all I think about
You won't be back I've got to face the truth
When you left your love I couldn't live without
And he was there when I needed you

He was there when I needed you
Doin' all the things you used to do
He's made me smile again he's not you but then
He was there when I needed you

He was there when I needed you
Doin' all the things you used to do
He's made me smile again he's not you but then
He was there when I needed you
