I Still Dream About You

Wynette Tammy

I wonder if you wonder How I'm doin' now from time to time And when you're sleepin' do I ever Quietly walk through the shadows of your mind

And I still dream about you Nights seem to go on without end But when they end I wake up cryin' And I still dream about you now and then

All of the nights we spent together Come ridin' through my mind on memories And it's so hard so hard to forget you When my mind thinks you've spent the night with me

And I still dream about you Nights seem to go on without end But when they end I wake up cryin' And I still dream about you now and then

And I still dream about you Nights seem to go on without end But when they end I wake up cryin' And I still dream about you now and then Yes I still dream about you now and then
