

## Love Survived

Wynette Tammy

The odds we wouldn't make it were a million or more to one  
The chance we'd stay together was something less than none  
You know we've hurt each other many times  
And more than once we've reached the point where love was on the line

I guess that we just had to see how much our love could take  
We tried it till we bent it but we never let it break  
And baby the feelin's still alive  
For through it all our love survived

Right at the first we didn't know what love was all about  
We wore it pretty thin sometimes but never wore it out  
We loved each other even when it hurt  
For we both knew if love fell through that nothing could be worse

I guess that we just had to see how much our love could take  
We tried it till we bent it but we never let it break  
And baby the feelin's still alive  
For through it all our love survived  
Through it all our love survived
