

Where Some Good Love Has Been

Wynette Tammy

There's your ring my ring on the table
Now they won't ever hurt our hands again
Cause when the lights go out tonight we won't be together
So let's take a good look where some good love has been

Your love and my love is almost over
And it won't be long till memories begin
Only in our minds we'll find the times we found each other
So let's take a good look where some good love has been

It hurts so much the night we touched
I knew we'd lost the feelin'
And when those things can't be explained
There's no use concealin'

With your ring and my ring on the table
It's so silent now you can almost hear it end
Cause when the lights go out tonight we won't be together
So let's take a good look where some good love has been
Let's take a good look where some good love has been
