

Good Bye Forever

X-Core

I try to pretend that I never knew your name
You're everything I hate, just everything I hate
Too bad, too bad
I can't turn back time and do the same
I thought you would be my mate
You would be my mate

Wooou, don't need you anymore
Wooou, don't need you anymore, wooou, wooou
Wooou, standing in the heavy rain
But I will take care of my way, wooou, wooou

You can't see straight because
You think you're better than me
But you're the same, yeah as everyone else
Can't believe all this time, all this anger stayed in me
All this anger stayed in me, stayed in me
Stayed in me, stayed in me

Wooou, don't need you anymore
Wooou, don't need you anymore, wooou, wooou
Wooou, standing in the heavy rain
But I will take care of my way, wooou, wooou

She was just another pretty face,
Full of treachery
That could be heard miles away, miles away
You're going far away,
You were never coming home
Good bye forever

Wooou, don't need you anymore
Wooou, don't need you anymore, wooou, wooou
Wooou, standing in the heavy rain
But I will take care of my way, wooou, wooou

Wooou, don't need you anymore
Wooou, don't need you anymore
