

# Big Blue House

X

The sun is down behind the Safeway  
The snow is pink on a mountain  
The black and white dog is under the table  
Spaghetti is boilin' on the burner

Would you please stop listenin' to your eyes crackin' open  
Would you please stop watchin' the sound of your heart in the m  
irror  
In the big blue house, in the big blue house

I don't want to scatter your ashes  
The floor is dirty enough as it is  
And I don't want to speak of you kindly  
Besides the phone is upstairs

Would you please stop wishin' that you could stop wishin'  
That you could float out of your life like a cloud  
In the big blue house, in the big blue house  
In the big blue house

Calm down, calm way down  
Everything's gonna be all right, everything' gonna be all right  
In the big blue house

Would you please stop wishin' that you could stop wishin'  
That you could float out of your life like a cloud  
In the big blue house, in the big blue house  
In the big blue house

Everything's gonna be all right, everything' gonna be all right  
In the big blue house, in the big blue house  
In the big blue house, in the big blue house
