

# 4ever

Xana

So it's already been 6 months  
And I kinda hate how the time just goes and goes  
Feels strange to think about how  
I used to be somebody you didn't know  
Now you're the first I always call  
And I share my clothes and fears with you all  
Hang our pictures high on the wall  
Cause we know it's something special  
Yeah, we know it's something special

We know we're gonna miss it  
When we get a little older  
Cuddled on the couch  
Now I'm crying on your shoulder  
I think I fell in love  
But it feels a little better  
I could stay right here  
In this house with you forever

Some things are meant to be  
And some are accidental  
You make me believe  
The world can be gentle  
Every minute here I get more sentimental  
You cry in my arms and I put on the kettle  
We do what we want  
The girls are allowed  
Had a panic attack  
Now we're going out  
You're bleaching your brows  
We're laughing out loud  
God, I love the girl house

We know we're gonna miss it  
When we get a little older  
Cuddled on the couch  
Now I'm crying on your shoulder  
I think I fell in love  
But it feels a little better  
You can brush your teeth  
While I'm singing in the shower  
Sitting in the hallway  
Shit talking for hours  
Say you wanna go  
And I'll follow you wherever  
But I could stay right here  
In this house with you forever

Crawling into your bed  
In the middle of the night  
When I'm a little sad  
Cause you make it all right  
Wherever you go  
One thing is true  
Home is where I love you  
They could stick us in a movie  
Or up in the Louvre

I'd even go to hell if it meant with you  
How'd we get so lucky  
Sweeter than honey  
Home is where you love me  
Home is where you love me

We know we're gonna miss it  
When we get a little older  
Cuddled on the couch  
Now I'm crying on your shoulder  
I think I fell in love  
But it feels a little better  
You can brush your teeth  
While I'm singing in the shower  
Sitting in the hallway  
Shit talking for hours  
Say you wanna go  
And I'll follow you wherever  
But I could stay right here  
In this house with you forever

Dancing 'round the kitchen  
Like handsome ballerinas  
And we're all just a little bit  
In love with Amelia  
Running down the street  
Said I'll meet you on the corner  
Now you're overseas  
And I'm down in California  
They say talk is cheap  
So I'm standing here screaming  
Part of my heart  
Goes with you as you're leaving  
I could stay right here  
In this house with you forever

I could stay right here  
In this house with you forever  
I could stay right here  
In this house with you forever  
I could stay right here  
In this house with you forever

I could stay right here  
In this house with you forever  
(Forever, and ever, and ever, and ever, and ever)  
I could stay right here  
In this house with you forever  
I could stay right here  
In this house with you forever

I could stay right here  
In this house with you forever  
I could stay right here  
In this house with you forever  
I could stay right here  
In this house with you forever

(I could stay right here  
In this house with you forever  
I could stay right here  
In this house with you forever  
I could stay right here

In this house with you forever)
