

## Two Worlds

Xandria

(In one world we dream  
Only in one we live

On this journey of wonders  
Forever we'll live in one  
One of two)

Once we found a spark in us  
Enough to let us survive  
Rise up and illuminate  
Gave way to journeys

A bright future's history  
Jules Verne and Tomorrowland  
Sweet dreams shine so silvery  
In our newfound glory

How can all these dreams prevail  
(It's such a fragile hope)  
'Cause a spark can give such light but also burn it all

And forever on this journey  
We were close to the wonders still awaiting us  
And forever in this universe  
We can only live in one of two worlds

(One of two worlds  
One of two worlds)

Something never leaving us  
The wolf still among the sheep  
Fake news cover bloody hands  
And they still want more

Around every corner now  
Orwell's next dystopia  
Is this world the closer one  
Chosen over wonders?

How can all these dreams prevail  
(It's such a fragile hope)  
'Cause a spark can give such light but also burn it all

And forever on this journey  
We were close to the wonders still awaiting us  
And forever in this universe  
We can only live in one of two worlds

(Only one)

Two worlds are waiting in twilight of time  
Last bridge between them is slowly becoming frail

Searching, dreaming, creating, killing  
Consciousness failing  
Wake up, get up  
This is not a movie fantasy

Rise up, fall down  
We'll have to choose the way we go  
Now

How can all these dreams prevail  
(It's such a fragile hope)  
'Cause a spark can give such light but also burn it all

And forever on this journey  
We were close to the wonders still awaiting us  
And forever in this universe  
We can only live in one of two worlds

(One of two worlds  
One of two worlds)  
One of two worlds  
One of two worlds
