Universal

Xandria

(I will fight if I live another day)

I gave it all, in silence
Until I could not anymore
I see the hours passing by every day

But I'll never gonna hide forever
You should know there will be the day for us
When we raise our thousand voices
Screaming out loud

No more possessing our bodies and minds
No more oppression by your holy lies
Enough is enough
Now we claim it back
Our Universal right

I will fight our fight
Til the end of our time
I will fight if I live another day

I can hear all their cries
In this everlasting night
Now we claim it back
Now we take it back
We will never let it go
We will fight our fight

In our name remember
A fragile world is what we built
We cannot let them take it all away

How I wish I could be standing with you
When we let the world see our face
I am one of thousand voices
Let's scream it out loud

I will be holding your hands in the end
Our eyes will be closed but we will never bend
Enough is enough
Now we claim it back
Our Universal right

I will fight our fight
Til the end of our time
I will fight if I live another day

I can hear all their cries
In this everlasting night
Now we claim it back
Now we take it back
We will never let it go
We will fight
We will fight

See me now
Ripping it off from me

I am no slave no more
Nobody owns my life

Once we will just be a memory
All that is left is the pain you feel
But all this blood has not been shed in vain
Not been shed in vain

I will fight our fight
Til the end of our time
I will fight if I live another day

I can hear all their cries
In this everlasting night
Now we claim it back
Now we take it back
We will never let it go

See my veil
I let it fall
See who I really am
I let it fall
