

Shake It

Xavier Rudd

We will feel, I know, everything you stand for is wrong
We get stuck, showed up, see what's laid upon you as you grow
And if you break these chains, will your universe seem more aligned?
And if you ease that pain
You'll notice to yourself you'll be more kind
Say, it's all about kindness

Say it, hey, can you feel it?
Forget about the bullshit in your life and dance
Come on, fuck it, shake it all off and let it all go tonight
Can you feel it? Forget about the good things in your mind and move
Come on, shake it, shake it all off, and let it all go tonight

Shake it all off and let it all go tonight

We all need sometimes, forget about the bullshit dancing in our heads
And we got grooves designed, to move that dancing feeling to the legs
And we got love, you see, clearly meant to be spread far and wide, ay
So can you love me? And I will love you, my beautiful friend, tonight

It's all about love, say it, hey, can you feel it?
Forget about the bullshit in your life and dance, come on, fuck it
Shake it all off and let it all go tonight, can you feel it?
Forget about the good things in your mind and move, come on, shake it
Shake it all off and let it all go tonight, can you feel it?
Forget about the bullshit in your life and dance, come on, fuck it
Shake it all off and let it all go tonight, can you feel it?
Forget about the good things in your mind and move, come on, shake it
Shake it all off and let it all go tonight
Shake it all off and let it all go tonight

Come on, shake it, shake it all off, and let it all go tonight
Come on, shake it, shake it all off, and let it all go tonight
