Xdinary Heroes

Every doubt I felt
It buried me alive
They left me here to die
Yeah, heartbeat's getting low
Every breath, no air, became a do or die
A million miles to surface
Emerging, out of all the lies
To step into the light

Hey
Got the whole world burning
Can somebody save me?
Fire in my mind

You didn't know that I'm a diamond
I got proof in my eyes
Oh, you didn't know until this moment
I know what I am

When the pressure's all on me
Getting crushed, I wanna scream
Getting low
Feel alone
But it's coming like a dream
Baby, new philosophy
You and I, tonight
Cutting free

Hey
Got the whole world burning
Can somebody save me?
Fire in my mind

You didn't know that I'm a diamond
I got proof in my eyes
Oh, you didn't know until this moment
I know what I am

I'm falling in velvet, slow motion
Come and feel, luminate, clarity in the night
You wanna steal moments I've kept hidden deep inside
You got me baring my facets just for you, I'll cut through anything

'Cause you didn't know that I'm a diamond
I got proof in my eyes
Oh, you didn't know until this moment
I know what I am
