

Anything But The Truth

Xentrix

Creating deceit just to serve and provide
Treacherous tales for our lives
Promoting the word of the psychotic way
Deception and lies
Indulging the fear of the action of fools
Mixing the real with fake
Abandoning reason, the fire in their eyes
Their biggest mistake

Lead the way - they'll embrace
When the lights go out and the fear begins
Fear the enemy, fear the proof
When the faith is gone and the weak cry out
Feed them anything but the truth
Anything but the truth

Take hold of wisdom and hide it away
Seducing the herd to obsess
Twisting the tale, grind out the path

Fuel the distress
Belittle the sane, destroy what they say
Speak any tongue, poison the well
With the power of fear

Lead the way - they'll embrace

When the lights go out and the fear begins
Fear the enemy, fear the proof
When the faith is gone and the weak cry out
Feed them anything but the truth
Anything but the truth

When the lights go out and the fear begins
Fear the enemy, fear the proof
When the faith is gone and the weak cry out
Feed them anything but the truth
Anything but the truth
