

The One You Fear

Xentrix

Weekend by this demon next to me
Frozen no control at all
Sentenced to a life of misery
Left staring at the wall

No faith just despair - A thousand yard stare
This pain will ignite - Terror then spite

I'm now who you hide from
New unconfined form
Under change ascending
Fell em rise above you
Feel me destroy you
Now I'm the one you fear

Severed from all true reality
Warden of my soul
Held down with a fierce brutality
Afflicted by control

No faith just despair - A thousand yard stare
This pain will ignite - Terror then spite

I'm now who you hide from
New unconfined form
Under change ascending
Fell em rise above you
Feel me destroy you
Now I'm the one you fear

I'm re-energised, all systems realign
I'm your decide unobstructed
I am on the rise, all systems now alive
I am fate defied, reconstructed

I'm now who you hide from
New unconfined form
Under change ascending
Fell em rise above you
Feel me destroy you
Now I'm the one you fear
