

# Almost done

X:IN

X:IN, right on

At just three, started acting, I felt strange and afraid  
Then I grew fond of music, made me switch up my lanes  
Got a key for the place, I've been grindin' for years  
To the top, gotta race, no more time for no tears  
I've been wanting and wanting to be the best of the best of all  
In SK, feeling lost painted on that canvas, a picture of my future  
Now my mantra "bold and badass", call it girl boss  
Eyes on the prize, keepin' it ☐ (baek)  
First pre hook is up

I can feel it, don't give up  
It's almost here, your time is coming  
None deserves it more, be with us till the end

Hey, pitch it up, what? Gonna pitch it up  
I will take it off, back to the pitching up  
Hey, pitch it up, what? Gonna pitch it up  
Keeping it strong, you won't see me breaking  
Hey, pitch it up, what? Gonna pitch it up  
I will take it off, back to the pitching up  
Hey, pitch it up, what? Gonna pitch it up  
Keeping it strong, you won't see me breaking

Is that the best that you've got?  
To show, don't just work hard, do it right  
Even if in pain, you're to blame  
That's what I've been told since I started out  
Maybe I need to follow such heartless advice  
Let go of my pride and let my confidence shine  
This is why I dream big  
Hope one day I'll become someone else dream

I can feel it, don't give up  
It's almost here, your time is coming  
None deserves it more, be with us till the end

Hey, pitch it up, what? Gonna pitch it up  
I will take it off, back to the pitching up  
Hey, pitch it up, what? Gonna pitch it up  
Keeping it strong, you won't see me breaking

Stumblin', fallin', they laughed at me on stage  
All auditions failed, so I trained 'til I lost my breath  
Go on, can judge, can hate, no, they won't make me break  
Stay humble, be the one who's gonna set your fate  
Straight A's, dancing, olympiads, dubbing, dawning  
I did it all, I'm built too raw  
Yappin', yappin', yappin', look at you  
Now tell me, who's the flop?  
It's like I'm blessed since I was born  
All the way from busking to K-pop  
Straight up, pedal to the metal  
Keep my head up, never give up, make 'em see that  
I know better, lemme pave my way

Hey, pitch it up, what? Gonna pitch it up  
I will take it off, back to the pitching up  
Hey, pitch it up, what? Gonna pitch it up  
Keeping it strong, you won't see me breaking
