

# LEAN ON ME

XODIAC

Took a second to fall for your eyes  
Baby, you know it's true, yeah, yeah  
And we've been through so much hand in hand  
Both the bad and the good  
And I'll be someone you can lean on  
I'll be the home you belong  
When your world is crashing down  
Baby, just lean on me  
We'll make it  
Promise we'll make it, you'll see  
I know I'm not perfect, but I will be  
Putting all my time in this, girl, you'll see

So take it  
Take all of me cause it's free  
And I'm ready for this  
You know I am

'Cause when your heart bleeds  
When you just can't breathe  
Honey, you should know I'll be there for you  
Lean on me, lean on me, lean on me  
Lean on me lean on me lean on me  
'Cause girl, you and me, we don't need to speak  
I can see through you  
You know that, don't you  
Lean on me lean on me lean on me  
I'll be there for you  
I'll be there for you

Highs and lows  
I don't care where we go  
All I care about is you with me  
We'll make it our show  
If the sky is crashing down  
I'll make another for you  
Count the stars cause they're shining just for you  
We can fly all night, we got miles for life  
Cause I'm never getting tired if you're by my side  
We go step by step, yeah, yeah, yeah  
I'mma keep you right on track

So take it  
Take all of me cause it's free  
And I'm ready for this  
You know I am

'Cause when your heart bleeds  
When you just can't breathe  
Honey, you should know I'll be there for you  
Lean on me, lean on me, lean on me  
Lean on me lean on me lean on me  
'Cause girl, you and me, we don't need to speak  
I can see through you  
You know that, don't you  
Lean on me lean on me lean on me  
I'll be there for you

I'll be there for you

Keep me alive  
Every single night  
Every single day  
Every single breath I take  
You're like the air I breathe, my DNA  
I don't wanna let you go  
Wanna feel you close  
Make me want it, make me feel it  
And this feeling's all I know  
Angel eyes, perfect dream  
You can light me up, baby, like the sun, yeah  
We can glow all night  
Count the stars, they're shining for you

'Cause when your heart bleeds  
When you just can't breathe  
Honey, you should know I'll be there for you  
Lean on me, lean on me, lean on me  
Lean on me lean on me lean on me  
'Cause girl, you and me, we don't need to speak  
I can see through you  
You know that, don't you  
Lean on me lean on me lean on me  
I'll be there for you  
I'll be there for you
