

## Nebula

Xov

Looking at the night sky, Nebula  
You're my God, my religion  
Take me to Cobain, Nirvana  
Into a new dimension  
Yes I've been smoking, yes I am high  
I'll never die if I ever die  
Like I'll be a legend, make something out of my life

Rise above it all, inshallah  
I shall shine like Tutankhamun  
I live and die with the sun  
But my time will come

What does it take?

Thinking of tomorrow, Futura  
It's a dark, twisted fiction  
If I can change it, Hallelujah  
I dream of more affection  
Yes I've been drinking, I'm in my zone  
I need nobody, good on my own  
Like I'll mount to something  
Titanic, when I'm gone

Rise above it all, inshallah  
I shall shine like Tutankhamun  
I live and die with the sun  
But my time will come

What does it take?

Oh, I'm small like an atom, atomic bomb  
I got the power  
Gotta crack the code  
I swear I won't abuse it  
Just let me use it

What does it take?

All praise the most  
All praise the most high

What does it take?
