

Understanding

Xscape

What I need from you is understanding
How can we communicate
If you don't here what I say
What I need from you is understanding
So simple as 1,2,3
Understanding is what I need

You don't even know me
You just wanna do what you wanna do
That's not the way it should be no
You should listen to me, boy
I tried so very hard to make you understand
But the chooses you make
Baby they're all demands oh

I tried so very hard
To keep our love alive
But you don't wanna meet me half way
Then the understanding dies

There's no way that we can work it out
If we don't pull together
I don't mean to be demanding
I want some understanding
I wanna be with you

What I need from you is understanding
How can we communicate
If you don't here what I say
What I need from you is understanding
So simple as 1,2,3
Understanding is what I need

I listen to you baby
And I know the things your going through
I try to understand,
That's why i'm still with you baby
See everyday we're living
There's one thing that'll always be unsure
That's why I need you baby, pleading baby
Please let our love endure

I tried so very hard
To keep our love alive
But you don't wanna meet me half way
Then the understanding dies

There's no way that we can work it out
If we don't pull together
I don't mean to be demanding
I want some understanding
I wanna be with you

What I need from you is understanding
How can we communicate
If you don't here what I say
What I need from you is understanding

So simple as 1,2,3
Understanding is what I need

All I need , All I need
All need is understanding
How ow ow ow
If you don't here what I say
Can't you see baby

I tried so very hard
To keep our love alive
But you don't wanna meet me half way
Then the understanding dies

There's no way that we can work it out
If we don't pull together
I don't mean to be demanding
But I want some understanding
I wanna be with you

What I need from you is understanding
How can we communicate
If you don't here what I say
What I need from you is understanding
So simple as 1,2,3
Understanding is what I need
