

something to cry about

XYLØ

Girl next-door
Happy hardcore
Looking for a real bad time
Out the back door
I'm the dark horse
A semi-automatic smile

If it's bad for me
Then I want it
If it's a tragedy
Yeah I want it
And if you lie to me
Then you know that's how I like it 'cause
Only like it 'cause
'Cause it really hurts

I want to fall in love
So someone can break my heart
Make me your number one
Then we can fall apart
I know it sounds crazy, baby
But I'm addicted to the pain
I want to fall in love
So there's something to cry about

I can see the tears falling down
From Westlake Village
To London Town
Meet me on the Westside
Meet me on the Westside
Broken hearts forever

La-la-la-la-la
Something to cry about
La-la-la-la-la
Something to cry about

I've been up all night
Been out of my mind
Waiting for the world to end
Filling up my glass
And drying my eyes
Cheers to the sadness

If it's bad for me
Then I want it
If it's a tragedy
Yeah I want it
And if you lie to me
Then you know that's how I like it 'cause
Only like it 'cause
'Cause it really hurts

I want to fall in love
So someone can break my heart
Make me your number one
Then we can fall apart

I know it sounds crazy, baby
But I'm addicted to the pain
I want to fall in love
So there's something to cry about

I can see the tears falling down
From Westlake Village
To London Town
Meet me on the Eastside
Roses on the bedside
This won't last forever

La-la-la-la-la
Something to cry about
La-la-la-la-la
Something to cry about

I know it sounds crazy, baby
Yeah
I know it sounds crazy, baby
Give me something to cry about
