

Nice Day to Die

XYZ

Early sky, morning sun, I made it to the light
To realize I'm too far gone to face another night
Dreams don't last forever, somebody lied
Somebody lied

It's a nice day to die
It's a nice day to go straight to the sky or way
down below
It's a nice day to die

Deadly life obsolete I take a look around
Black and white one way street six feet under the
ground
Wheels don't turn for the better
I'm down to goodbye, I'm down to goodbye

It's a nice day to die
It's a nice day to go straight to the sky or way
down below
It's a nice day to die
It's a nice day to go over the line, end of the show
It's a nice day to die! Die! Die!

Dreams don't last forever
Somebody lied,
Somebody lied

It's a nice day to die
It's a nice day to go straight to the sky or way
down below
It's a nice day to die
It's a nice day to go straight to the sky or way
down below
It's a nice day to die
