

this love is gold

Yang Da Il

Oh
I know we'll be alright
This love is golden
Got me holdin' on
Through the changes
I know that we still glow
In pain, through heat, reshape
We will be alright
'Cause I know this love is gold

All the love we see in all the movies
They makin' it look easy, so meant to be
Real life is a different story
Take 1, action! There's no cuts, baby
You and I, we had to learn it all the hard way
Each happy ending always brings another day
We can never know when the next storm hits
Let it come and make us strong

When I lose it, you hold my hand
Show me I'm just a man
Just tryin' my best to figure it out
You get me through it
How do you do it?
Embrace me while you're upset
Together we shine inside the fire

This love is golden
Got me holdin' on
Through the changes
I know that we still glow
In pain, through heat, reshape
We will be alright
'Cause I know this love is gold

Look at us now, my baby
We've leveled up insanely
Emotions, navigate them
Openly, calmly speaking
Doing it often lately
We'll always be in the making
Love is the air I breathe
When you're with me

This love is golden
Got me holdin' on
Through the changes
I know that we still glow
In pain, through heat, reshape
We will be alright
'Cause I know this love is gold

And we will be alright, yeah
I know that we'll be alright
Be alright, be alright
'Cause I know this love is gold
