

## Fear Love

YCEE

Would you stay with me? Could you take the day off?  
If I ever lose you swear it would be chaos  
They all told me that you've always been a player  
Heard it's 'cause you had your heart broken, aiyaa

Promise you I'll treat you better, I'll show you a different way  
We could take it easy like it was Saturday  
Life gave you lemons, would you let me be lemonade  
Wanna be the best thing you got on your worst day

Swear I got you, would be beside you  
When the world is beating you down Imma fight for you  
Imma sacrifice for you, sacrifice for you  
Let me be all you need, satisfy for you

All these girls, all these girls, they all jealous  
Tell them all, tell them all, better get lost  
Wanna be with you, no dey fear love  
I don't wanna leave you, nothing near us

No dey fear, no dey fear, no dey fear love  
Why you dey fear? You too dey fear, no dey fear love  
No dey fear love, no dey fear love  
Why you dey fear love? You too dey fear love

Tell me why I no go fear love?  
Yeah they warned me but I no dey hear word  
It's really getting messed up  
Banging on the headboards  
I really feel uncomfortable  
I don't like being vulnerable  
I gotta do what I gotta do  
Even though that means not loving you  
Past experience is the worst  
I don't know how it works  
The same way that it turns out  
New flame getting burnt out  
You and I know the truth  
Ain't no need for no excuses  
Ain't no need for all the lies  
You and I know the truth

Tryna find the best analogy  
Think I'm falling no gravity  
More than physics it's chemistry  
Got me thinking biology

Know I got you, feeling brand new  
Know it's popping every time I come around you

Swear I got you, would be beside you  
When the world is beating you down Imma fight for you  
Imma sacrifice for you, sacrifice for you  
Let me be all you need, satisfy for you

All these girls, all these girls, they all jealous  
Tell them all, tell them all, better get lost

Wanna be with you, no dey fear love  
I don't wanna leave you, nothing near us

No dey fear, no dey fear, no dey fear love  
Why you dey fear? You too dey fear, no dey fear love  
No dey fear love, no dey fear love  
Why you dey fear love? You too dey fear love

I'm scarred and my heart is heavy, I know you hear me  
That's the reason I don't let nobody near me  
I know I messed up, what would you have me do?  
I don't wanna regret if I end up loving you

Promise you, I'll never leave you alone  
My life was empty, you filling it up  
You're all I want when I get in my zone  
Ain't gotta buy me Louis Vuitton

I could be your shooting star  
Make a wish, I swear I'm yours  
I could be all you need, everything you want

Ahhh
