## Years & Years

I know you feel the earth moving  
Under your feet, the plates are breaking  
Oh  
Somebody told me that time can breathe  
In a moment, you find eternity  
Oh

So, I'll stop the world from turning  
Stars are all ablaze  
No word in any language  
A feeling with no name  
Stop the world from turning

If all around us, the waters rise  
I wouldn't falter if you were by my side  
Say it, just, just say it, say it, just, just say it, say it, just say it  
Hand on your shoulder and reaching out  
I am your soldier and I will stand my ground  
Say it, just, just say it, say it, just, just say it, say it, just say it

And I'll stop the world from turning  
Stars are all ablaze  
No word in any language  
A feeling with no name  
And the future is uncertain  
People come and go  
But don't ask me if I love you  
It's the only thing I know  
It's the only thing I

I know the toll it takes  
You're drowning in the hate  
Keep holding on to me  
Don't lose hope  
The world that you believe  
It's not always what it seems  
Utopia's a place we can go

Yeah, I'll stop the world from turning  
Stars are all ablaze  
No word in any language  
A feeling with no name  
And the future is uncertain  
People come and go  
But don't ask me if I love you  
It's the only thing I know
