

I wanna love, I wanna leave  
I want you to love me  
I want you to leave me  
I wanna stand where I can see  
I'm watching you love me  
I'm watchin' you leavin' me now

I wish I could be somebody else  
I wish I could see you in myself  
Wish there was something inside me  
To keep you beside me and  
Say what you really feel  
You know I need something that's real  
I wish there was something inside me  
To keep you beside me

I wanna know if I could be  
Someone to turn to  
That could never hurt you  
But I know what you think of me  
Yea, you had a break-through  
And now I'm just bad news for you

I wish I could be somebody else  
I wish I could see you in myself  
Wish there was something inside me  
To keep you beside me and  
Say what you really feel  
You know I need something that's real  
I wish there was something inside me  
To keep you beside me

I should've told you everything  
I never gave you anything  
I should've told you everything  
If I could give you anything  
You know I'd tell you everything

I wish I could be somebody else  
I wish I could see you in myself  
Wish there was something inside me  
To keep you beside me and  
Say what you really feel  
You know I need something that's real  
I wish there was something inside me  
To keep you beside me

I should've told you everything  
I should've told you everything  
I should've told you everything
