

Not

Yendri

My software's running sweet and good
Everything is working like it should
I'd doing all my tasks
Even though no one asks
But when I went to that place
Everything got out of pace

I'm not in love 'cause I just can't
It cannot be at least for me
'Cause if I would, it wouldn't be good
And I wouldn't be working like I should

I was created to perform
And not to waste my time with
Other things I cannot calculate
But now it's much too late...
