

It's Over

Yes

Baby you'll need a replacement
Baby I'm moving on
I've been in one place far too long
Its time that I was gone
I know I said when we started
Time would ease along
We were on a road to nowhere
Speed of sound

Our wait blows over
Punks fade away
As you sit by your window
Holding tears at bay

Its over
Will you still feel me though I'm not there
Its over
Where will you go when the lights are low
Its over
What will you do when the nights are long
Its over
Its over for you and me

I've come to tell you
Something I need to say
Its been coming for sometime
Never happened today
All those times I loved you
I really loved you
We need a new face
A brand new day

Its over
Where will you go when the lights are low
Its over
Will you still feel me though I'm not there

Now I'll be movin'
I won't leave you a key
I'm so near as our memory
And that's all we need
Our wait blows over
Punks fade away
As you sit by your window
Holding tears at bay

Its over
Will you still feel me though I'm not there
Its over
Where will you go when the lights are low
Its over
What will you do when the nights are long
Its over
Its over for you and me
