

The Ice Bridge

Yes

Those that have lived before
They breathe and walk through us
A course relayed
Round our sacred fires
That light up these hillsides
At dawn we shall begin

With fear of extinction
We're pushed to the edge of the ice
Instinctive direction
X2 a drive to survive

All eyes to the east
All eyes to the east
In a vision
Snowflower Elder crossed

He has seen
Snowflower Elder
He has walked forest green
All eyes to the east

Stand tribe to tribe
For we are the lords of the future
True pillars of life
And if we're to arrive
Through such desperate times
We must stand unified

Traces of ancestral faces
Project on a blizzard torn sky
In a game of do or die
Fly clear with the falcon
Perceive through the eagle's eye
This is exponential ancient overdrive

No turning back
We must cross the Ice Bridge
Onward to sunrise
In a race against time

All eyes to the east
In a vision
Snowflower Elder crossed

All eyes to the east
In a vision
Snowflower Elder walked
Lands of green

All eyes to the east
In a vision
Snowflower Elder crossed

All eyes to the east
In a vision
Snowflower Elder walked
