

Pixel Affection

yeule

Wasted
Wasted in a cyber dimension
Pour my heart into simulation
Teach each other reciprocation
I'm staring at the screen that you live in

I'm trying to remember your name then
The memory before I awaken
Is coded to a million fragments
But all I had was pixel affection

Pixel affection
Pixel affection
Pixel affection
Pixel affection

Shadows follow me and I let them
I wanna leave the world I was left in
Unstable online interconnection
I'm trying to remember your name then

The memory before I awaken
Is coded to a million fragments
Consuming all the bones I have broken
But all I had was pixel affection

Pixel affection
Pixel affection
Pixel affection
Pixel affection

Wasted
Wasted in a cyber dimension
Pour my heart into simulation
Teach each other reciprocation
I'm staring at the screen that you live in
I'm trying to remember your name then
The memory before I awaken
Is coded to a million fragments
But all I had was pixel affection
