Engine For Gabriel

Ylvis

Sikia,
Sikia hadithi ya ajabu kuhoozhu Gabriel.
Ndoto,
Ndoto kubwa
Lakini injini ni ndogo mno.

Down in Kenya, a boy once had a vision
A dream to soar the mighty skies
People laughed at him,
"You will never make it. It's just a fantasy."
But he swore he would never give up trying
He tried and tried and tired and tried
And when he tested plane fourteen, it looked very promising
Until it didn't look promising at all.
All he needs is just a little help,
From his friends around the World…

Gabriel!
You're a true aviator
Sooner or later, you'll be king of the sky
Gabriel!
Mr. Airplane Creator, never give up your dream
We'll give you the wings to fly!

"What more can we do to help Gabriel? You know, we need help from someone wh
o loves flying and just knows everything about airplanes."
"I know just the guy!"

This is old Bjørn Kjos from Ringerike
A legendary aviator man

"I am the founder of Norwegian, which is a company flying all over the world
 with more than 100 aircrafts. We have bases in Bangkok, and..."

We don't care about your airline, can you help us?
What is Gabriel doing wrong?

"I think he needs a bigger engine, at least 100 horse power. Something like
a Rotax 914 or similar."

That's enough old man,
Let's get back to our plan!

Gabriel!
We will get you an engine,
The Rotax 914 – the horsepower king
Gabriel!
We hope you are ready,
That your airplane is steady
When you leave the ground

Kurusha ndege barani Afrika
Injini ndogo
Tuna ufumbuzi!
Kurusha ndege barani Afrika
Injini ndogo
He needs a bigger engine

Much-a bigger engine
Gabriel needs an engine
Rotax injini
Are you gonna help your brother?
I'm gonna help my brother
Injini ndogo
Tuna ufumbuzi!

Gabriel!
King of the skies
We will give you the wings to fly
Injini, Gabriel will fly
