

6 / 8 Dream

Yoav

My first friend
In a dream of falling
Told me
About these battered old wings
'Til I drifted too high
In my arrogant sky

Next friend
Found me lost and alone
Moonlight
Our only companion
Howling and crying
We were wild life was long

What's behind your face?
What's under your skin?
Everyone knows now try to remember it
What's behind your face?
What's under your skin?
Everyone knows now try to remember it

These words
Will eventually fail
1001 nights in a permanent shade
Next thing that you know
It was ten years ago
Since you were alive
Since you opened your eyes wide

What's behind your face?
What's under your skin?
Everyone knows now try to remember it
What's behind your face?
What's under your skin?
Everyone knows now try to remember it
