

No Reason

Yodelice

Mmm...

It don't work the way you want it to
Some curse has put a spell on you
Words don't ever come out right
The dice won't roll for your side

No reason to hide your love
That's no reason to hide your love
No reason to hide your love
That's no reason to hide your love

Can't sleep
Another night of toss and turn
Driving dreams
Another night of crash and burn
Hard to see the promise of another year
Hard to be the one who never gets to care

No reason to hide your love
That's no reason to hide your love
No reason to hide your love
That's no reason to hide your love

The secrets of your heart (No reason to hide your love)
No one cared anymore (That's no reason to hide your love)
The way you want it to be (No reason to hide your love)
Only you can (?) (That's no reason to hide your love)
No one can know what you see (No reason to hide your love)
Blue for you could be red to me (That's no reason to hide your love)
If you don't dream it (No reason to hide your love)
It will never be (That's no reason to hide your love)
