

Jump / Fall

Yoke Lore

You are a force of nature
I told you in the bedroom
Pull me down to the world beyond this cloud
I'm ready for the ground

I am plagued by the quiet damage the gravity does each day
Calculate how time plots with growing pains to kill my flame
I'll watch and I'll wait while the world spins right by me
Get my heart out of the way, take the leap or stay the same

Did you jump
Or did you fall
When the world was crashing down all around you
Did you feel it all
Did you jump
Or did you fall
When the world was crashing down all around you
Did you feel it all

You found steel when you opened me up
And I'm learning to be real so I can be your someone
But there are so many holes in me
And I'm so afraid you'll slip and tumble into one

Did you jump
Or did you fall
When the world was crashing down all around you
Did you feel it all

Did you jump
Or did you fall
When the world was crashing down all around you
Did you feel it all
